

World Class **Sheet Extrusion** Systems

Professional Services

for both PTi /non-PTi equipment

Highly Trained Technicians provide assistance for a variety of site service requests:

LASER ALIGNMENT

Laser bore alignment services assure prolonged machine life and avoidance of production difficulties associated with mis-aligned equipment. Laser alignments are typically within 0.001" to 0.003" and are performed by our professional, experienced service engineers.

SHEET DIE CLEANING AND INSPECTION

For trouble-free operation, it is essential that your sheet die is thoroughly cleaned at regular intervals and that extreme care be taken during the cleaning process. PTi technicians are experienced in properly adjusting and cleaning sheet dies to meet operating specifications.

PROCESS EVALUATION

Our experienced Process Specialists assist with process issues you may encounter. We evaluate equipment, troubleshoot, and provide recommendations to improve the quality of your final product.

FEED SCREW AND BARREL INSPECTION/ REPLACEMENT

PTi MICs the feed screw and measures the barrel to check for wear. If necessary, PTi provides replacement feed screw and barrel quotes to optimize performance.

ROUTINE MAINTENANCE AND MACHINE REPAIR

Constrained by time or short-staffed? PTi technicians are available with the necessary equipment and parts to perform the recommended routine maintenance on your equipment.

MACHINE AUDIT/ INSPECTION

PTi technicians inspect equipment for proper operating conditions and provide detailed reports of their findings.

Call PTi Customer Services representatives today to schedule your next extrusion service request. 630-585-5800

Our service technicians will be dispatched quickly to your facility with local service support available in as little as one hour. Emergency services are also available evenings, weekends, and holidays. **Call for more information.**
