Valid thru 2/29/2024

### Mechanical Roll Lock-outs

Improve operator safety...

Consider upgrading or retrofitting a PTi roll stand with mechanical roll lock-outs and achieve:

- ✓ Greater protection against serious injury when servicing chrome rolls during maintenance, cleaning and thread-up activities
- ✓ Redundant protection via both electrical and mechanical interlocks that prevent chrome rolls from inadvertently closing when in the Lock-Out position
- ✓ Heavy duty engagement for securing the mechanical stops into and out of the Lock-Out position via an industrial pivot latching mechanism
- ✓ Lock-out Tag-out safety latch mechanism and a proprietary design prevents mechanical stops from rubbing on chrome roll shaft journals when secured in a normal production position.

Additional discounts may apply on purchases of two or more Roll Lock-out Kits. Contact your Customer Service Representative for details.

Don't wait until you need replacement parts for your system —  
keep your production line operating at peak performance!

Contact our Customer Service department or your service representative to ensure your inventory minimizes downtime and saves money.
